Project Design Phase-II

Data Flow Diagram & User Stories

Date	04 October 2026
Team ID	SWTID-2026-6870
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams

A Data Flow Diagram (DFD) shows how data enters and leaves the system, what changes it, and where it is stored. The diagram below shows the flow for a Standard Laptop order.

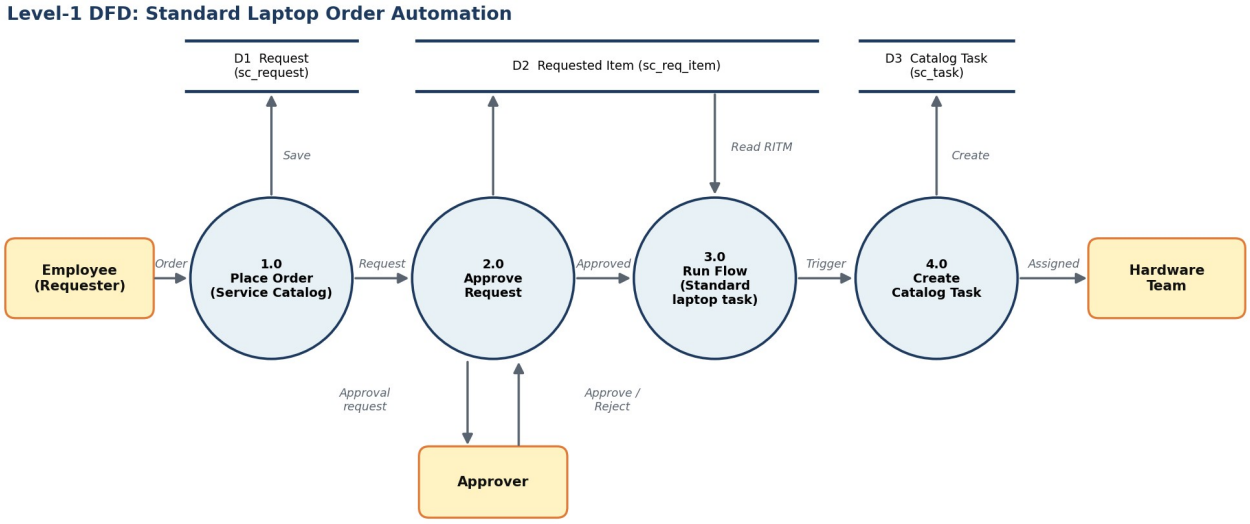

Figure 1: Level-1 Data Flow Diagram

Element	Description
Employee (Requester)	Places the Standard Laptop order from the Service Catalog
1.0 Place Order	Creates the Request (REQ) and Requested Item (RITM) records
2.0 Approve Request	Approver reviews and approves the request in the Approvers related list
3.0 Run Flow	Flow "Standard laptop task" starts through the Service Catalog trigger and reads the Requested Item
4.0 Create Catalog Task	Create Catalog Task action creates a task in sc_task with short description, description, assignment group Hardware and approval Approved
Hardware Team	Receives the task and configures the laptop

User Stories

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance criteria	Priority	Release
Flow developer	Flow creation	USN-1	As a flow developer, I can create the flow "Standard laptop task" in the Global application running as System User.	Flow appears in Flow Designer list	High	Sprint-1
		USN-2	As a flow developer, I can add the Service Catalog trigger so the flow starts when a catalog item is ordered.	Trigger saved with Service Catalog	High	Sprint-1
		USN-3	As a flow developer, I can add the Create Catalog Task action with short description, description, Assignment group Hardware and Approval Approved.	Action shows all field values	High	Sprint-1
		USN-4	As a flow developer, I can save and activate the flow.	Flow status is Active	High	Sprint-1
Catalog administrator	Flow assignment	USN-5	As a catalog administrator, I can attach the flow to the Standard Laptop item under Process Engine.	Process Engine shows the flow name	High	Sprint-1
Employee	Ordering	USN-6	As an employee, I can order a Standard Laptop from Service Catalog > Hardware by clicking Order Now.	Order status page shows request number	High	Sprint-2
Approver	Approval	USN-7	As an approver, I can approve the request from the Approvers related list.	Approval state becomes Approved	High	Sprint-2
Hardware team member	Task verification	USN-8	As a Hardware team member, I can see a catalog task assigned to my group with a clear short description.	Task visible under the Requested Item	High	Sprint-2
Project team	Testing	USN-9	As the project team, we can run functional tests and UAT on the flow.	All test cases executed and recorded	Medium	Sprint-2
	Documentation	USN-10	As the project team, we can document the project and results.	Report completed	Medium	Sprint-2
