Project Demonstration

Demo Walkthrough & Talking Points

Date	04 October 2026
Team ID	SWTID-2026-6870
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	Not specified

1. Demo overview

This guide helps you present the project in about 5 to 7 minutes. It shows how a Standard Laptop order automatically produces a catalog task for the Hardware team.

Goal	Show that approved laptop orders create a Hardware configuration task without manual work
Platform	ServiceNow – Flow Designer and Service Catalog
Flow name	Standard laptop task
Catalog item	Standard Laptop (Hardware category)
Sample records	REQ0010001, RITM0010001, SCTASK0010001

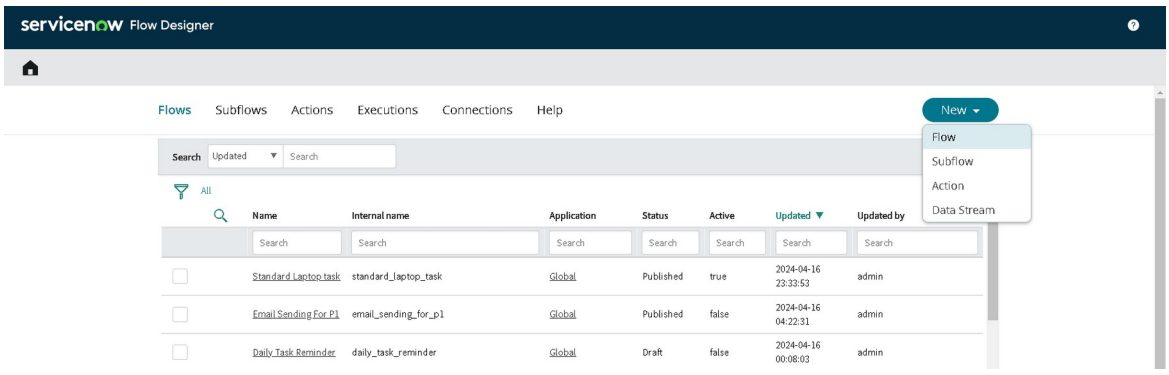

2. Opening (30 seconds)

"IT teams often create laptop configuration tasks by hand, which causes delays. My project automates this with ServiceNow Flow Designer: when a Standard Laptop is ordered, a task is created and assigned to the Hardware team automatically."

3. Step-by-step demo

Step 1: Show the flow

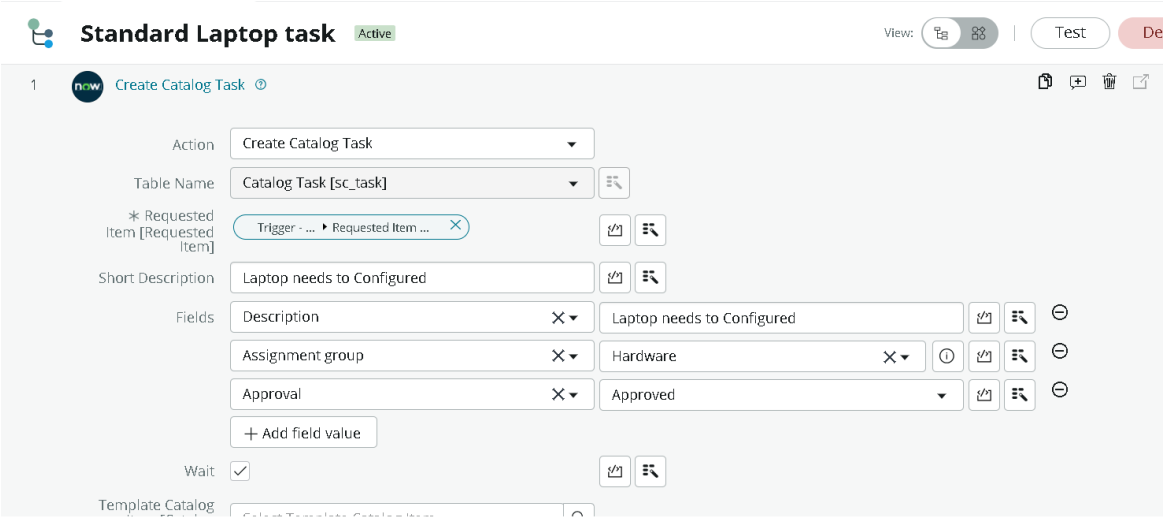

Open Flow Designer and show the active flow **Standard laptop task** with the Service Catalog trigger.

Flow list in Flow Designer

Step 2: Show the action

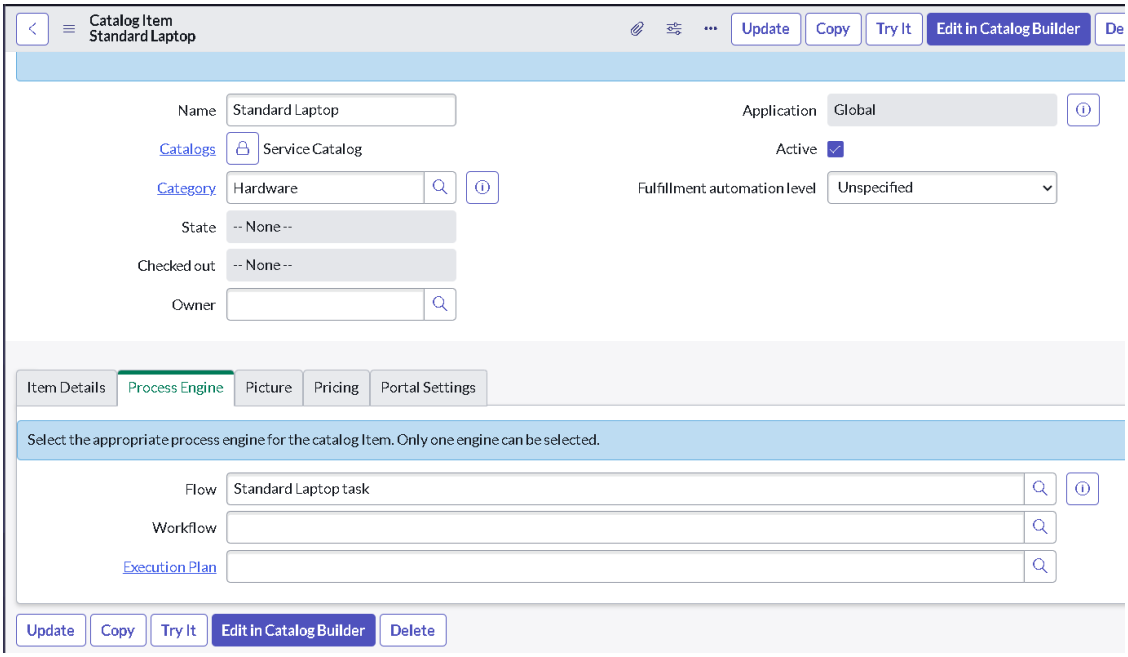

Open the Create Catalog Task action. Point out the Requested Item from the trigger, short description, Description, Assignment group Hardware and Approval Approved.

Create Catalog Task action

Step 3: Show the flow assignment

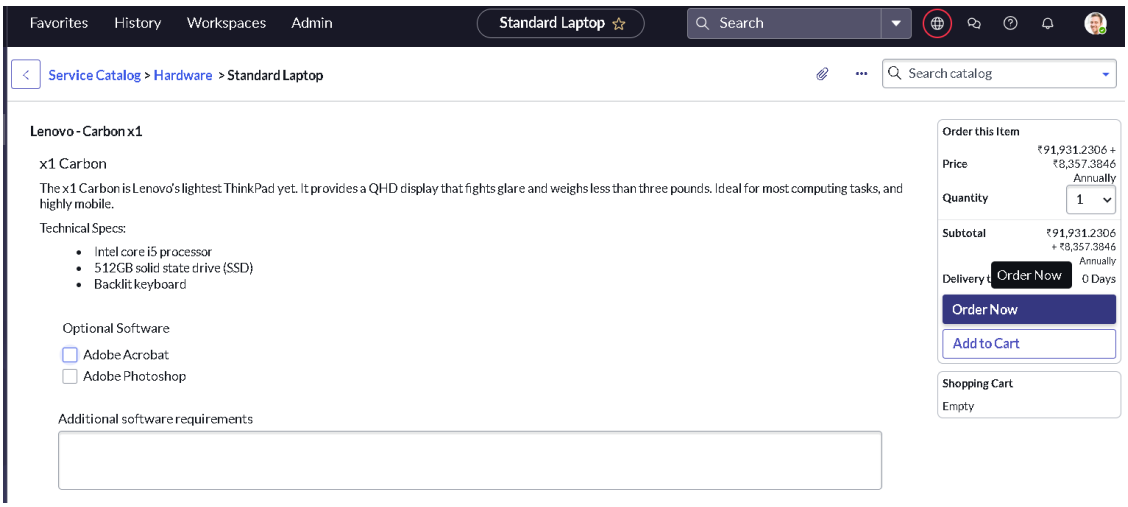

Open Maintain Items > Standard Laptop > Process Engine to show that the flow is attached to the catalog item.

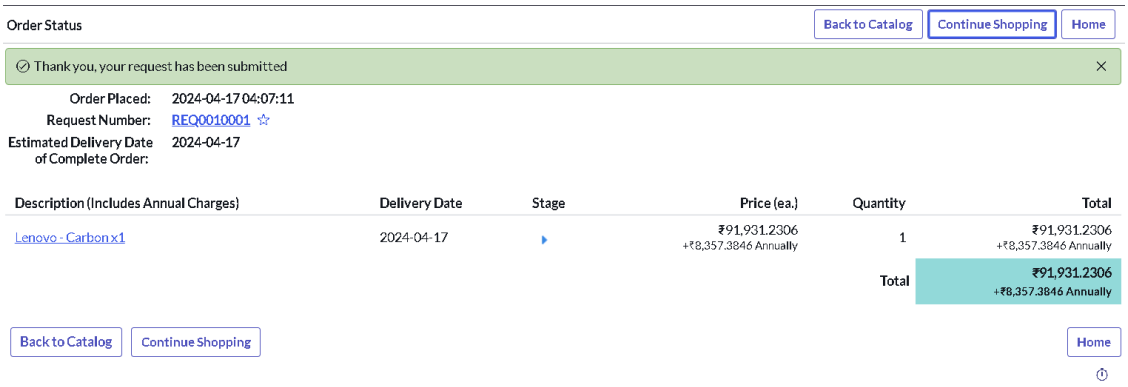

Process Engine tab

Step 4: Place the order

Go to Service Catalog > Hardware > Standard Laptop and click **Order Now**.

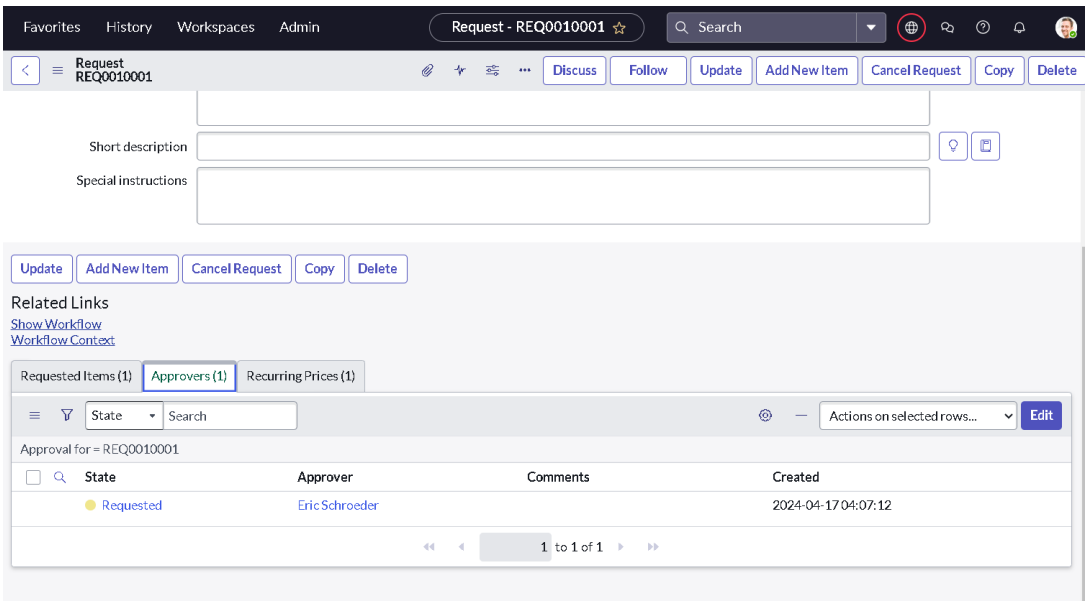

Standard Laptop catalog item

Order status with request number

Step 5: Approve the request

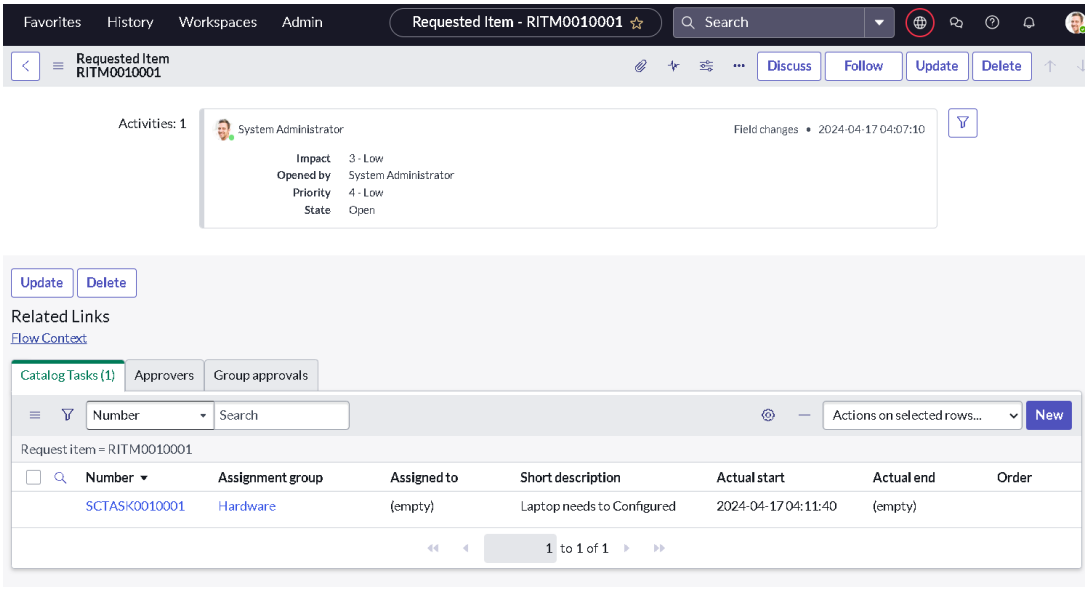

Open the request number, go to the Approvers tab, right-click the record and choose **Approve**.

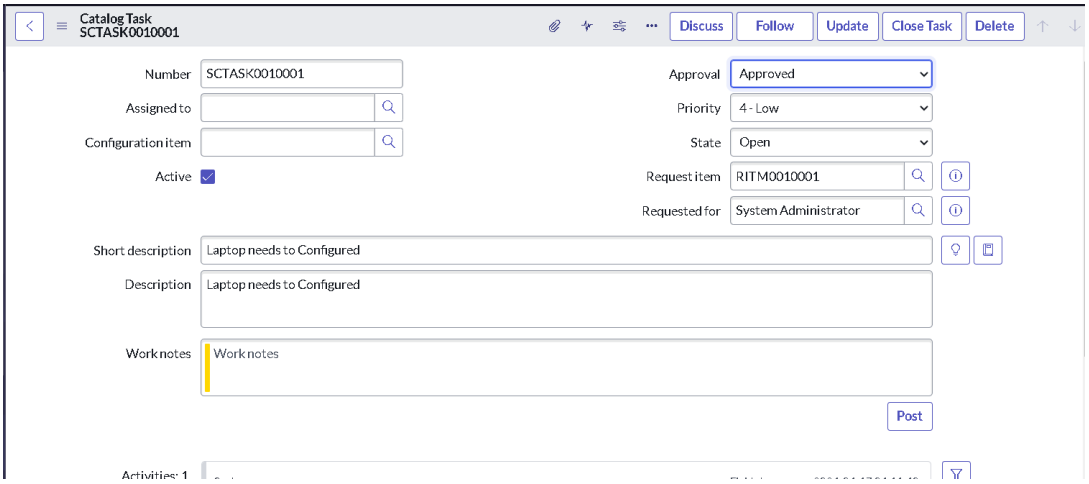

Approvers related list

Step 6: Show the generated task

Open the Requested Item and the Catalog Tasks tab. Show SCTASK0010001 assigned to the Hardware group, then open it to show the short description.

Catalog task under the Requested Item

Catalog task details

4. Closing (30 seconds)

"With this flow, standard laptop orders create their configuration task automatically, reducing delays, manual effort and missed tasks. The same approach can be extended to other catalog items."

5. Possible questions and answers

Question	Suggested answer
Why Flow Designer instead of a workflow?	Flow Designer is the current low-code automation tool in ServiceNow and is easier to build, read and maintain.
Why Run As System User?	So the flow can create the task regardless of the requester's roles.
What does the Create Catalog Task action do?	It creates a record in the Catalog Task table linked to the Requested Item with the configured values.
How would you improve it?	Add an approval step inside the flow, notifications to the requester and SLA tracking.
Can it be reused?	Yes. The flow can be copied for other catalog items and assignment groups.
